## Changing Indian Foreign Policy

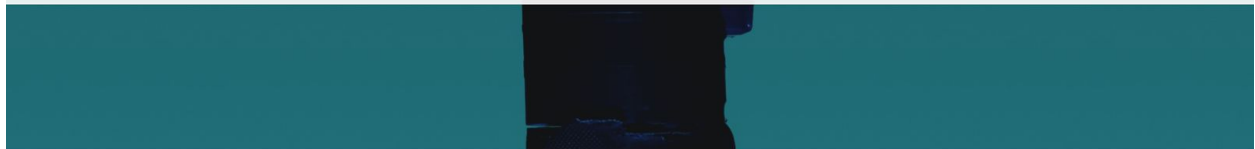

Thought paper written for International Relations class

Posted by Sakshi Shrivastava on November 21, 2020 · 6 mins read

I am an ICT Engineer from Gujarat, India. ICT is Information and Communication Technology, which basically mean that I studied an amalgamation of Computer Science, Electronics and Communication subjects. My interests lie towards more hardware and electronic side of things. Though physics is my one true love.

I like to think of myself as a perpetual student and like to keep pushing my horizons. Therefore, you will often find me dabbling in a new hobby or finding a new shiny thing to obsess over. But most often than not you will find my nose buried in a book.

## BTech Project: Laser Propulsion of Nanosat to Low Earth Orbit

An attempt to integrate control theory to existing laser propulsion literature.

## Embedded Systems Design: Bluetooth Control Pick and Place Robot
